Construction of 138 kV Collection Cable

Greetings,

Pink Solar, LLC is requesting permission to anchor a 138 kV electrical transmission line to the outside girder along the underside of the bridge deck on the northern side of the County bridge on County Road No. 1061 also known as CR 1061 over McWright Branch, which is located in Greenville, Hunt County, Texas.

A site location map is attached below.

If you have any questions, please contact me at any time.

Sincerely,

Leander Stuckmann
Project Manager

Phone 518 243 8638

- The bridge in question is located at these coordinates: 33°10'12.1"N 96°10'57.2"W.
- The 138 kV electrical transmission line will be anchored to the outside girder at locations acceptable to the County
- The electrical transmission line is light weight and will not compromise the structural integrity or load carrying capacity of the bridge.
- The purpose of the electrical transmission line is to facilitate transmission of renewable energy from a solar farm to the Pruitt Substation.
